AND ITS RELATION TO THE ROMANCE OF WOOD

FROM the time "Cedars of Lebanon" were specified by Solomon for his temple and even from earlier days down to modern civilization, *wood* has played a prominent part in the life of man.

There is something about wood that brings it closer to us humans than other materials. Perhaps it is the fact that this wood we use today was once a towering tree, alive, and beautiful to behold. Certainly, something of this life and beauty is felt even after the tree is cut down, in that we find a softness and warmth in everything made from it. For these reasons we have chosen *wood* as the medium of expressing the *art* which goes into every Woodart product.
